Education

Michigan State University

GPA: 3.8/4.0

Bachelor's of Science in Computer Science, Minor in Data Science

Aug 2022 - May 2026

- **Coursework:** Object Oriented Software Design in C++, AI, Algorithm Engineering, Web Application and Architecture Development.

Work Experience

Data Science Intern - iSON Xperiences Ltd.

Jul 2023 - Aug 2023

- Conducted an EDA and trained a model on a 1.85 million data-point dataset to identify paying customers with 87% accuracy and prioritize calling them on the call center rotation.
- Process automated retrieving fresh datasets weekly with Selenium and Python saving 3 hours every week and reducing human error.

Student Library Assistant - Digital Multimedia Center MSU Library

Jan 2023 - Present

- Wrote a Python script using Selenium to aggregate deals on major online marketplaces, saving the library dozens of hours of manual effort each month.
- Managed front desk operations, managing room and library checkouts while employing the LoC and ROVI classification systems to shelve and retrieve media.

Resident Assistant - Michigan State University

August 2024 - Present

- Facilitated and oversaw a floor of 53 residents to foster student engagement and mediated conflicts among residents to promote community building.
- Worked in a team of over a dozen resident assistants and resident directors to uphold university values within a building inhabiting 1400 residents.

Projects

OpenFiche - Spartahack 2025 (Winner - Specialized Mastery)

- Developed and hosted a search engine with React and Flask that filters out AI pages to preserve high quality, human generated content, ranked results using a custom PageRank-based algorithm.
- Built a lightweight, research-focused web browser with QT featuring a Git-style graph history manager and an advanced reader mode to enhance reading and tab management.
- Engineered a web crawler to index 320,000+ pages from NPR, CNN, and Wikipedia, leveraging NLTK for NLP keyword analysis and a weighted ranking system for improved search relevance.

Journalingo - University of Chicago Hackathon 2024 (Winner - Best use of Auth0)

- Developed a video journaling web app that analyzes body language and tone to uncover hidden emotions, helping users gain deeper self-awareness. The model demonstrated accuracy by identifying genuine and feigned emotions in performances by actors like Hugh Laurie in his House M.D. audition tape.
- Won Okta's sponsored award for showing proficiency in developing a secure user data pipeline with Auth0.

Wolverine Helper - MHacks Submission 2024

- Embedded Meta's open source Llama 3 LLM with data from UofM coursework to boost accuracy on course related questions by 80% and encourage learning with a "Show don't tell" teaching technique.
- Developed a tool to modularly vectorize any text, PDF, website on the model.

Skills

Python, C++, Process Automation, Automated Testing, Web Automation, React, Flask, API Development, Data Analysis/Modeling, Excel, Pandas, Tensorflow, Excel
